

An Introduction to using the Clappes generated Application without any coding

Clappes – Community Portal

Application Name – Course Management System

Overview – The purpose of this sample Application – code-named CMS was built using the Clappes Engine without a single line of code. This is to illustrate the power of the new disruptive way of Application Building. The CMS – Course Management System is designed to be used in a dual-mode - administrator-assisted mode and self-registration mode.

An Introduction to using the Clappes generated Application without any coding

Objectives of the CMS Application.

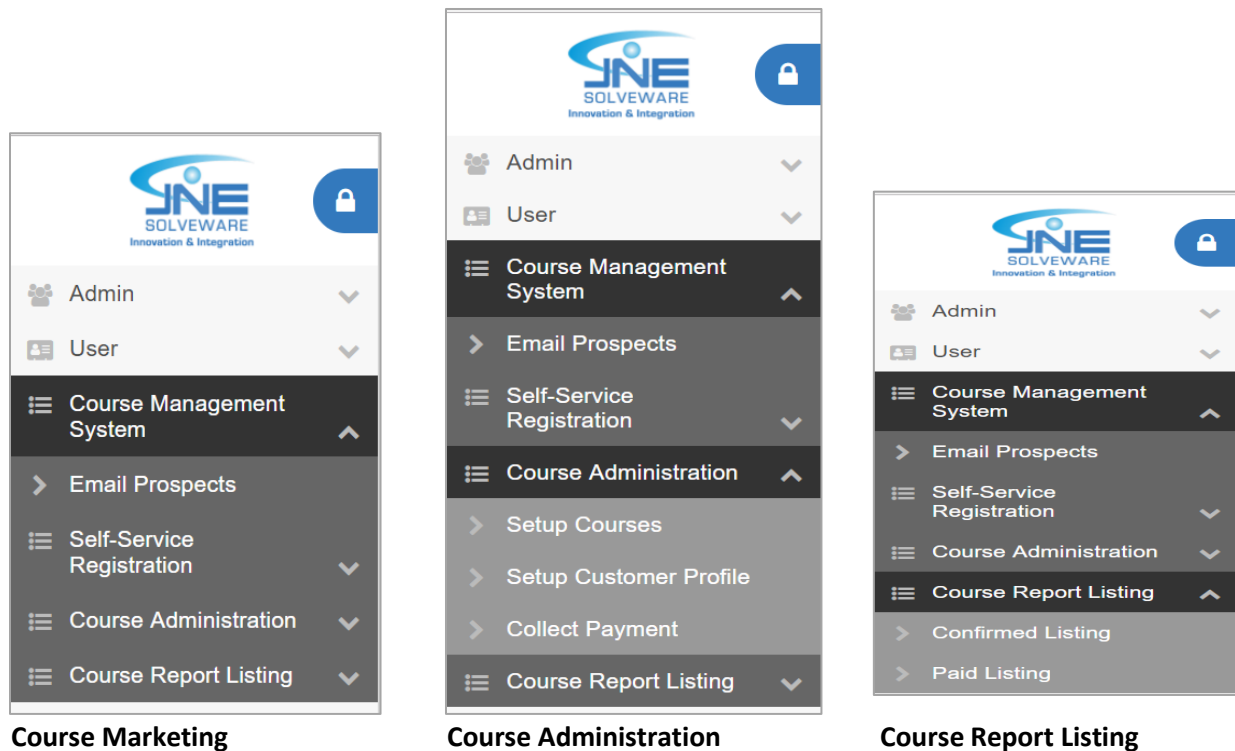

The CMS is built to support the following functions:

- Course Marketing Support for the marketing team
- Course Administration including administrative assistance for customers enquiring and/or registering to payment collection
- Course Reporting/Listing
- Self-Registration Mode – for digital marketing effect for prospects converted to Customer directly through the email campaign or other digital platform

Administrator Mode

The login ID will be **demo** and the password will be **welcome**

In this mode – all menu functions are available to the administrator as shown:

However – do take note that with the demo/welcome account - you should not try to register for the courses, as the demo account is not valid for the CMS self-registration function as this requires a user account which is a valid email-id.

Any such attempt will result in the error message:

Record not updated: **No Changes. Insert not performed. Invalid Email Address - demo**

An Introduction to using the Clappes generated Application without any coding

Self-Registration Mode

The login ID must be a valid email e.g. abc@yahoo.com

and the password will be emailed to the person registering for a new account.

In this mode – only the Self-Service Registration functions are available to newly registered user – who can be from the email campaign, existing customers or some other digital marketing campaign efforts.

User can browse and search for suitable courses to register.

User can choose to select multiple courses to self-register - through the Action – Register menu..

An email confirmation will be sent to the user immediately with a copy to the administrator if the Action is being selected.
